Quotes by Perry, Anne

from QuotationsBook.com

The daughter of Dr. Henry Hulme, a physicist, Perry was diagnosed with tuberculosis and was sent by her family to the Caribbean and South Africa in search of healthier climates. She rejoined her family when her father took a position as rector of the University of Canterbury in New Zealand.

... she knew in her heart that to be without optimism, that core of reasonless hope in the spirit rather than the brain, was a fatal flaw, the seed of death.

- Perry, Anne
